From the Big Bang to Black Holes How did the Universe begin? Does time have a beginning and an end? Does space have edges? Einstein's theory of relativity replies to these ancient questions with three startling predictions: that the Universe is expanding from a Big Bang; that black holes so distort

Many people think of the Big Bang as a cosmic explosion at a point in time in empty black space. But this is not a proper understanding of the Big Bang. Scientists believe that the Big Bang was actually the beginning of space and of time itself (space-time). The idea that time is part of the creation is very difficult to grasp.

The Big Bang "Theory" The Big Bang is actually not a "theory" at all, but rather a scenario or model about the early moments of our universe, for which the evidence is overwhelming. It is a common misconception that the Big Bang was the origin of the universe. In reality, the Big Bang scenario is completely silent about how the universe came into existence
