I've been thinking about the challenge of lean transformation for 27 years now, since I started studying Toyota as part of the MIT global automotive project in 1979. That's a long time, and during this period I've watched lean thinking progress through a series of stages. In the early years much of the focus was on sorting out what was specific to a culture. Could anyone outside of Japan ...

Japan's response to the challenge of internationalisation

is set at a very high level of cognitive challenge. Though it is applied nationwide, Japanese teachers have a remarkable level of autonomy in its application. The entire approach is aided by the shared belief that effort and not ability is what primarily explains student achievement. There is no tracking in Japanese schools, classes are heterogeneous and no student is held back or promoted on ...
